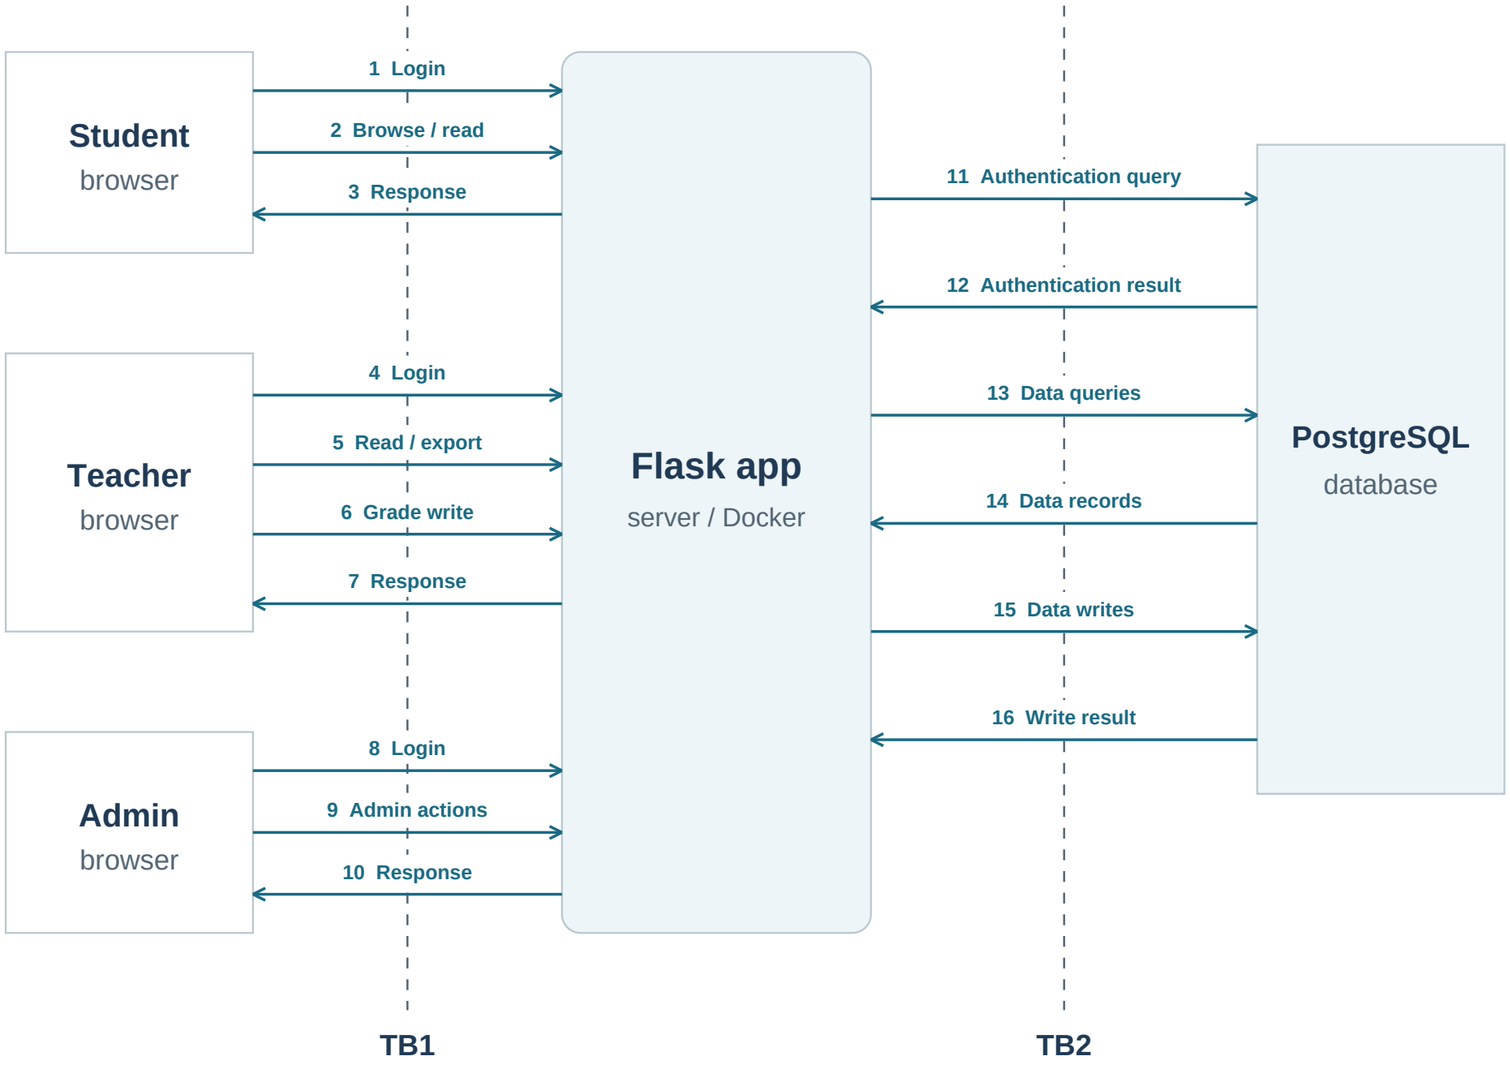
NotesApp - Numbered data-flow diagram

Session 02: Map NotesApp



TB1: Browser / server

TB2: Application / database

YOUR FLOW LIST

1 Student -> Flask
POST /login (username, password)

2 Student -> Flask
Browse/read/logout: session, JWT, grade ID

3 Flask -> Student
Login page/session; grades, comments, JSON, errors

4 Teacher -> Flask
POST /login (username, password)

5 Teacher -> Flask
Browse/export/logout: session, class ID

6 Teacher -> Flask
Session; note/student/class IDs, grade, comment

7 Flask -> Teacher
Login/session; grade page, CSV, redirect, errors

8 Admin -> Flask
POST /login (username, password)

9 Admin -> Flask
Session; action, username/password, role/user ID, host

10 Flask -> Admin
Login/session; user/class page, ping result, errors

11 Flask -> PostgreSQL
SQL authentication query (username, password)

12 PostgreSQL -> Flask
User ID, username, role, no match or error

13 Flask -> PostgreSQL
Queries for grades, comments, classes and users

14 PostgreSQL -> Flask
Grade/comment records; user and class lists

15 Flask -> PostgreSQL
Insert/update grades; create/delete users

16 PostgreSQL -> Flask
Statement completion or database error

Each number is one row in the STRIDE table.

Source: Session 02, slide 34; Viclant/NoteApp commit 1c83e42.
Numbers describe single-direction logical data flows.
